DETAILED ACTION

*** This office action is in response to Applicant's RCE and Amendment filed August 23, 2006. Claims 1-40 are pending.

Allowable Subject Matter

1. Claims 1-40 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
Applicant's amendment filed August 23, 2006 and convincing remarks have overcome the rejection in the last office action. The references of record including Aronowitz (6,033,998), Mukhopadhyay (6,399,448), Barsan (5,942,780), etc., alone or in combination, do not anticipatively disclose each and every aspect of the claimed method, or fairly make a prima facie obvious case of the claimed method for hardening at least a portion of a gate oxide layer on a substrate, which method, such as in claim 1, comprises patterning the first resist to create at least one exposed area of the oxide layer and at least one masked area of the oxide layer; hardening the at least one exposed area of the oxide layer using a remote plasma nitrogen hardening treatment having a temperature approximately less than 90°C; stripping the first resist; forming a second resist over at least a portion of the oxide layer masked by the first resist; patterning the second resist to create at least one exposed area of the oxide layer and conducting a second remote plasma nitrogen hardening treatment to create at least one second hardened area and at least one nonhardened area within the oxide layer.
